- Testing & Debugging
- Agile Methodologies
- Project Management
- Coding & Programming
- Wireframing & Prototypes
- Application Development
- Technical Troubleshooting
- Performance Monitoring

Technical Skills: HTML5, CSS, JavaScript, React, React-Native, Next.js, REST API, Python, Langchain, SQL, SQLAlchemy, PostgreSQL, MongoDB, Node.js, Flask, Jinja, Git, GitHub Terminal, Jasmine, Jest, WordPress

SELECTED PROJECTS

[TriboAI.com](#): Facilitated the development of an artificial intelligence (AI) powered creative toolkit that served as an image generator, background remover, video generator, music generator, and more.

[Ancy Friz](#): Led the development of the **Ancy Friz** website, streamlining the digital presence for a Sarajevo-based hair salon with modern tools and technologies.

PROFESSIONAL EXPERIENCE

Software Engineer | [App Wizard LLC](#), Fresh Meadows, NY 01/2023 – Present

- Designed and implemented innovative technology solutions for attorneys, helping law firms streamline operations and enhance their online presence through tailored branding, responsive websites, and user-friendly mobile apps.
- Pioneered the software development lifecycle from requirements gathering to system implementation, ensuring consistent alignment with firm and technology goals to create a cohesive digital experience.
- Optimized search engine optimization (SEO) and digital marketing strategies for client websites, driving increased online visibility, higher search rankings, and more qualified leads, significantly improving client acquisition.
- Delivered ongoing support and maintenance services for client websites and mobile apps, improving performance, providing timely updates, and promoting consistent user experience.

Web Developer | [Get Away Bucks](#), New York, NY 01/2024 – Present

- Promoted a variety of travel services, including Booking.com, by creating engaging content and strategically utilizing affiliate links to drive sales and generate commissions.
- Applied advanced SEO techniques, including keyword optimization and content structuring, to significantly increase website visibility, organic traffic, and affiliate marketing revenue.
- Leveraged high attention to detail and analytical skills to assess web traffic and conversion rates to refine marketing tactics, testing different approaches and identifying high-performing strategies to boost affiliate sales.

Fellow – Software Engineering | [Springboard](#), Remote 01/2022 – 01/2023

- Completed over 700 hours of hands-on coursework in software engineering, with guidance from industry experts, to develop advanced skills in both front-end and back-end development, databases, and algorithms.
- Successfully developed 4 full-stack portfolio projects, demonstrating proficiency in JavaScript, Python, React, and SQL while utilizing agile development methodologies to meet project goals.
- Demonstrated willingness to learn and gained expertise in debugging, problem-solving, and implementing data structures and algorithms; refined coding skills, engaged in code reviews, and resolved complex technical issues.

EDUCATION

Software Engineer, Springboard Software Engineer Bootcamp, 2023

Junior Web Developer: Full Stack Web Development, Udemy.com, 2018
